

## MEDIEVAL CASTLES PROJECT

The students learnt about the Middle Ages in History. In English, we studied vocabulary connected with medieval castles and watched and analysed a film called *Lancelot, First Knight* through which they found out about their culture, games, life and the feudal system.

After that, the students divided into groups and made their scale model medieval castles. For that, they used recycled materials, cardboard, plastic, wood, craft foam and even Lego bricks among others. They also designed their own coat of arms.

All the castles were exhibited at CDI for two weeks and the students gave their presentations there.

Then, teachers and students were invited to vote for the best scale model medieval castles.

Finally, all students got chocolate medieval coins and a diploma for excellent accomplishment the winners got a book and a lolly pop with a tattoo.
